

As a customer of T-Mobile, I'd like to voice my frustration with the many fees that they impose. It makes it impossible to compare prices with other providers.

When I opted for T-Mobile, my rate was advertised as \$39.99 but somehow I end up paying around \$55.00 a month. The cost of business that these fees supposedly over should be computed into the monthly rate and not tacked on.

Thank you for providing me an opportunity to voice my discontent.
